

LAKSHYA AGARWAL

+91 9389744079 | Greater Noida, UP | agarwallakshya778@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate (5th semester) with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, and Full-Stack Web Development. Skilled in C, C++, Java, Python, JavaScript, React.js, Node.js, RESTful APIs, MongoDB, and MySQL. Built and deployed 4 full-stack/AI-integrated projects, solved 200+ DSA problems across LeetCode, GeeksforGeeks, and Coding Ninjas, and led teams in hackathons including Smart India Hackathon 2026.

EDUCATION

KCC Institute of Technology and Management, Greater Noida — B.Tech, Computer Science & Engineering

CGPA: 7.82 (up to Semester 4) | Expected Graduation: 2028 | Class XII: 68% | Class X: 85.13%

TECHNICAL SKILLS

- **Programming:** C, C++, Java, Python, JavaScript, Solidity
- **Frontend:** HTML, CSS, React.js, Vite, Tailwind CSS, React Router, Axios, Recharts
- **Backend:** Node.js, Express.js, Flask, RESTful APIs, JWT, bcryptjs, Multer
- **AI / ML:** Google Gemini API, OpenAI API, spaCy, scikit-learn
- **Blockchain:** Solidity, Hardhat, Ethers.js, Polygon Testnet
- **Databases / Cloud:** MongoDB, MongoDB Atlas, MySQL, Cloudinary
- **Tools:** Git, GitHub, VS Code, Postman, Vercel, Render, Web Speech API
- **Core Subjects:** Data Structures & Algorithms, OOP, Operating Systems

PROJECTS

AI Interview Preparation Platform | *React, Node.js/Express, MongoDB, Google Gemini API* | [Live](#) | [GitHub](#)

- Built a full-stack MERN platform with JWT auth, AI-powered mock interview evaluation using Google Gemini API (scoring, strengths/weaknesses, model answers), and a DSA progress tracker with topic-wise breakdown
- Designed an analytics dashboard (Recharts) showing solve streaks, weak-topic analysis, and mock interview history
- Implemented 8+ features including voice input (Web Speech API), dark/light theme, random question mode, and printable reports
- Deployed full stack independently: frontend on Vercel, backend on Render, database on MongoDB Atlas

AyushConnect | *React, Node.js, Python/Flask, MongoDB, Solidity* | SIH 2026 · PS SIH26044 (Ministry of Ayush) | [GitHub](#)

- Built an AI + blockchain-powered academia-industry platform for the Ayush sector connecting students with internships and placements, addressing certificate fraud and skill-matching gaps
- Implemented NLP-based resume parsing and skill matching (spaCy, scikit-learn) via a Python/Flask microservice for JD-to-candidate match scoring
- Built blockchain-based certificate verification (Solidity, Hardhat, Polygon testnet) generating tamper-proof SHA-256 hashes for credential authentication
- Designed a gamification system (XP points, badges, leaderboard) and role-based dashboards for students, companies, and admins using JWT auth
- Contributed as a full-stack developer in a 6-member team — worked across React frontend, Node/Express REST APIs, and MongoDB schema design

Lost & Found | *React, Node.js, Express, MongoDB, JWT, Cloudinary* | [Live](#) | [GitHub](#)

- Built a full-stack MERN platform for campus communities to post, browse, and claim lost/found items with photo uploads via Cloudinary
- Implemented JWT-based authentication, a role-based admin panel (stats dashboard, item/user management), and an in-app notification system with unread-count badges
- Designed RESTful APIs (10+ endpoints) for item CRUD, claim/resolve workflows, and filtering/search by category, location, and type
- Deployed full stack independently: frontend on Vercel, backend on Render, database on MongoDB Atlas, with CI/CD via GitHub auto-deploy

RelaxBuddy — AI Mental Wellness Chatbot | *Python, Flask, HTML/CSS/JS, OpenAI API* | [Live](#) | [GitHub](#)

- Built a non-clinical AI chatbot providing empathetic, calming conversational support with a Flask backend integrated with an LLM (OpenAI)
- Implemented a safety layer with crisis-keyword detection that redirects to supportive messaging and helpline resources instead of clinical advice
- Designed a stateless REST API with a system-prompt-driven empathy layer and a typing-animation UI for a natural chat experience

ACHIEVEMENTS & LEADERSHIP

- Solved 200+ DSA problems on LeetCode, GeeksforGeeks, and Coding Ninjas — strong problem-solving skills across Arrays, Stacks, Queues, Linked Lists, Searching, and Sorting
- Participated in multiple hackathons as Team Leader, including Smart India Hackathon 2026
- Coordinator for college Technical Fest activities
- Volunteer at PYP (People for People), a social development organization
